DETAILED ACTION

This office action is in response to the amendment and remarks filed 12/14/06.

Newly submitted claims 23-29 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The original claims were directed to the invention of an apparatus "a gas turbine" classified in class 60, while the newly added claims refer to a non-elected invention "a method of making a gas turbine" classified in class 29. The indication by the examiner that the invention would more properly be claimed as a method of making did not imply that the case would be proper for examination in class 60 since class 60 does not deal with methods of making but with apparatuses. Therefore, if applicant wants to claim "a method of making a gas turbine", he/she should do it in a divisional application with class 29. Since there are no apparatus claims left to be examined in class 60, the amendment of 12/14/06 is non-responsive because this amendment has added claims directed a non-elected invention (by original presentation).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 23-29 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
